Exposure to techniques and technologies like:

- Bone Marrow Aspirate Concentrate Harvesting
- Mechanical Stromal-cell Transfer (MEST)
- Adjustable Regenerative Adipose-tissue Transfer (ARAT)
- Ultrasonic cavitation technology of Adipose tissue disruption
- Advancement in Platelet Rich plasma PRP & Platelet Poor Plasma
- Emulsified, Nano and Micro fractured fat techniques and technological advancement
- NK Cell-Based Immunotherapy
- Role of Scaffolds on regenerative medicine and many more....

Topics to be covered:

Orthopedics	Role of regenerative cells in treatment of Osteoarthritis, Avascular Necrosis, Achilles Tendinopathy, Sports injury, Chondral lesions, role of regenerative cells in pediatric Orthopedics etc
Neurology	Role of regenerative cells in treatment of Autism, Cerebral Palsy, Neuro developmental disorders etc
Gynecology & infertility	Role of regenerative cells in treatment in thin endometrium, in management of infertility etc Role of regenerative cell in Erectile Dysfunction, male infertility etc
Pulmonary	Role of regenerative cell in Chronic respiratory diseases, post COVID 19 recovery and management etc
Diabetes	Role of regenerative cell in Diabetes management, Diabetic foot and ulcer treatment etc
Aesthetics	Fat graft and it processing techniques, skin rejuvenation, aesthetic and regenerative gynecology
Cancer	N K cell therapy
